

ECOMONDO

THE **GREEN TECHNOLOGY** EXPO

5 - 8 NOVEMBER 2019 RIMINI EXPO CENTER - ITALY

Organized by

ITALIAN EXHIBITION GROUP
Providing the future

in collaboration with

ecomondo.com

ECOMONDO

THE **GREEN TECHNOLOGY** EXPO

Ecomondo is the international event of reference in the Euro-Mediterranean area for new models of circular economy.

We help companies to become world leaders in innovation, promoting the development of an entrepreneurial, innovative and sustainable ecosystem.

We safeguard the entire circular economy supply chain, from the recovery of raw materials and energy to sustainable development.

We encourage the international networking and growth of companies across all world markets.

Ecomondo runs simultaneously with **Key Energy**, the trade show dedicated to the energy supply chain: from renewable sources, to storage, efficient energy management, the use of digital technologies and future mobility.

Ecomondo in figures.

10% international visitors from **66** countries

80930 Attendance

+4% compared to 2017 edition

+98000 m²

1022 companies, **15%** foreign exhibitors
from **30** countries

+150 congresses/conventions with more
than **1000** speakers

+747 millions media contacts

Why participate.

MEET

To **meet** the sector's most qualified international buyers.

ENGAGE

To **engage** in discussion with the most innovative international businesses.

CONNECT

To **get in contact** with European institutions and universities.

PARTICIPATE

To **participate** in training and research events.

GROW

To learn about the latest innovations and **grow** your business.

Who visits.

Visitor profile.

Services	46%
Industry and distribution	34%
Public sector	5%
Construction	5%
Research and training	4%
Association/Institution/Specialist Media	4%
Agriculture	2%

Country of origin.

Europe UE	62%
Europe non-UE	15%
Africa	7%
Asia	6%
Central and South America	5%
Middle East	3%
North America	2%

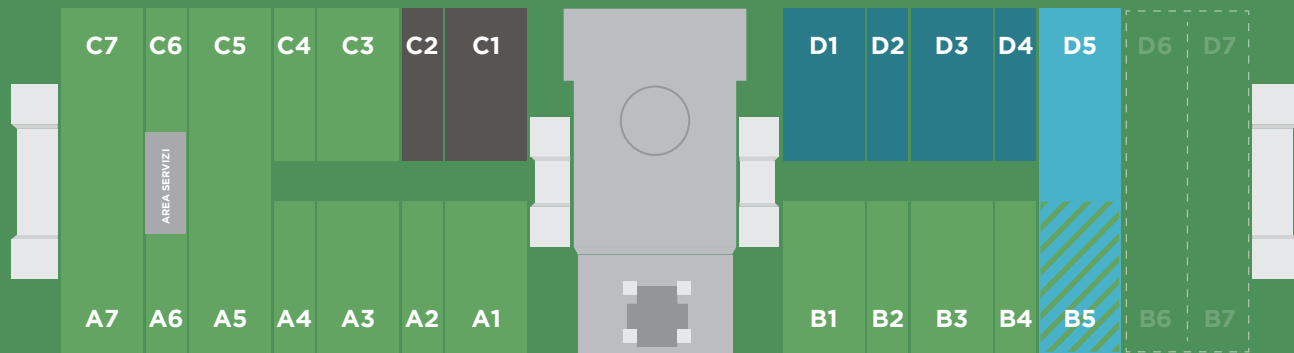

Platform for the Green & Circular Economy.

DECONTAMINATION AND HYDROGEOLOGICAL RISK

Redevelopment and decontamination of contaminated sites; prevention and management of significant environmental risks.

CIRCULAR BIOECONOMICS

Exploitation of organic waste, anaerobic digestion, bioenergy.

WASTE AND RESOURCES

Integrated management and exploitation of waste and materials.

WATER

Integrated water cycle and infrastructures; pollutant analysis, measurement and control.

KEY ENERGY

THE RENEWABLE ENERGY EXPO

Highlights 2019.

Global Water Expo

This is the section dedicated to all stages of the integrated water cycle supply chain, from collection to its return to the environment or industrial re-use.

Global Water Expo promotes networking between national and international utilities and technology manufacturers

Ecodesign - Raw Materials

The path to the transition to the Circular Economy is based on the efficient consumption of resources and the sustainable supply of raw materials.

The aim is to close cycles along the entire product value chain, from the design of products and production processes; at Ecomondo, innovative technologies and new business models..

Bioenergy - from biomass to biogas and biomethane

At Ecomondo, the systems and technologies capable of integrating the new production of renewable gas into the network and the market are on display. New technologies, solutions, regulatory insights on the development of the biogas/biomethane sector; especially for the agricultural sector through the conversion of biomass into finished industrial products, raw materials, energy or fuels.

Sal.Ve: Two-yearly ecology-related vehicle show

In 2019 Sal.Ve returns: the entire range of industrial and special vehicles for the collection of solid and liquid waste is on display, with the latest technological innovations. At Ecomondo the top players in the production of compactors, sweepers and equipment for hydrodynamic suction and cleaning, together with the manufacturers of frames and components in the same sector.

INFORMATION, TRAINING, FUTURE

Ecomondo is the only platform in Europe to offer a wide program of conferences, workshops and seminars aimed at presenting evidence and new trends, both national and international, related to the circular economy applied to the different supply chains: construction, packaging, electronics, automotive.

industry 4.0
new frontiers in recycling
plastic and bioplastics
drinking water resource
biorefineries
food waste
air quality
hydrogeological risk
